Advocates for Self (SAA.16)

Role Play Script

SETTING/CONTEXT: MATH CLASS.

PEER 1 (PLAYING TEACHER): Let's work through a problem together. Everyone write out the number 12, but include a decimal and write zeros out to hundredth's place.

PEER 2 /RICO: [Raises hand]. What is the hundredth's place?

PEER 1: Good question! The hundredth's place is second digit after the decimal. [Begins writing on the board]. So, we write the number 12 a decimal and then two zeroes after it. The first zero is the tenths place and the second zero is the hundredth's place.
